Memo to File:

Re: Atlas Minerals-(Assumed Operator)  
Unnamed Mine  
Emery County, Utah

This presently inactive mine was inspected on the 21st of September 1977 by Brian Buck and myself.

Since this presently inactive underground uranium mine is located between two (2) Atlas properties (Probe, #2, & #6), it is assumed to be under the control of Atlas Minerals. Present on site are a vertical shaft and gallows frame and numerous buildings.

The shaft here has been rendered safe through the installation of chain link fence. In addition some, but not all of the junk has been removed from the area.

One problem still exists, however, inside the hoist house, several unused blasting caps were found in plain view of any casual visitor.

In hopes that Atlas is the responsible party here, they will be contacted relative to this hazard.

RONALD W. DANIELS  
COORDINATOR OF MINED  
LAND DEVELOPMENT
